

Visualization Draft

Phoebe Dupa, Rebecca Martinez, and Shucan Zhao

1. Set up

Packages

Data

Cleaning weather

Cleaning metadata

Cleaning water parameters

Joining data frames

Figure 1

Plan

Presenting how dissolved oxygen (DO) differ across sites

- x-axis: different site names
- y-axis: DO
- `geom_jitter`: jitter to represent individual DO measurements
- red point: mean DO for each site

Figure 2

Plan

Presenting how dissolved oxygen (DO) varies across elevations at each site.

- x-axis: DO
- y-axis: Elevation code
- `geom_point`: visualize individual observations
- `geom_jitter`: jitter to represent individual DO measurements

Figure 3
